

Installation Instructions for the TBXZ-1-81, protective bag for valve actuator GOLD/SILVER C

1. General

The protective bag for valve actuator is used for weather protection at outdoor installation. The protective bag has a draw string and is made of polyester with internal plastic coating.

2. Maintenance

A check of functionality and to determine whether cleaning is necessary should be carried out at least twice a year.

3. Installation

The protective bag is threaded over the installed valve actuator and the draw string is tightened.
