

# Installation of the Smoke Extraction Adapter, TBXZ-1-93 GOLD/SILVER C PX

## 1. General

The smoke extraction adapter is designed for use with GOLD/SILVER C PX, size 004-040.

The smoke extraction adapter is used when you want to extract air to bypass the heat exchanger and filter, e.g. as a component in a system for smoke extraction. See the example.

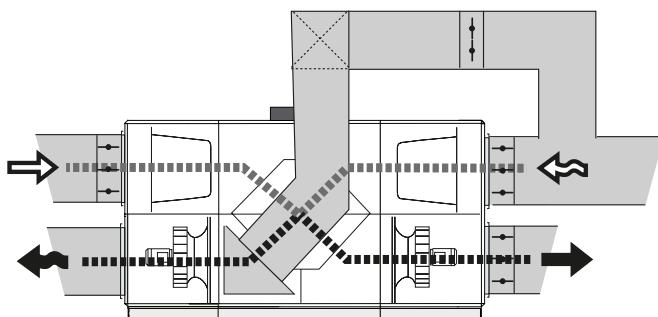

| Size, adapter | Part number  |
|---------------|--------------|
| 005           | TBXZ-1-93-05 |
| 008           | TBXZ-1-93-08 |
| 012           | TBXZ-1-93-12 |
| 020           | TBXZ-1-93-12 |
| 030           | TBXZ-1-93-30 |
| 040           | TBXZ-1-93-40 |

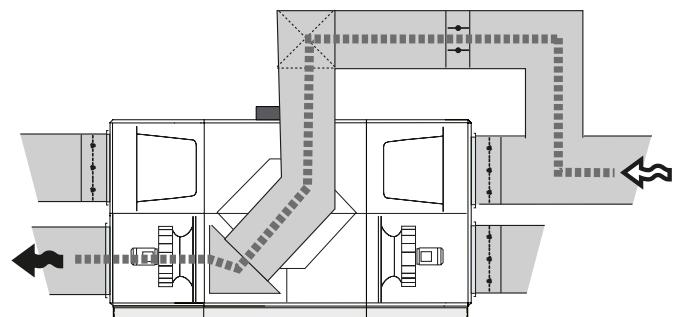

Smoke extraction adapter.  
Intake at the rear of the air handling unit.

## Example

Normal operation.

The extract air is routed to bypass the heat exchanger and filter

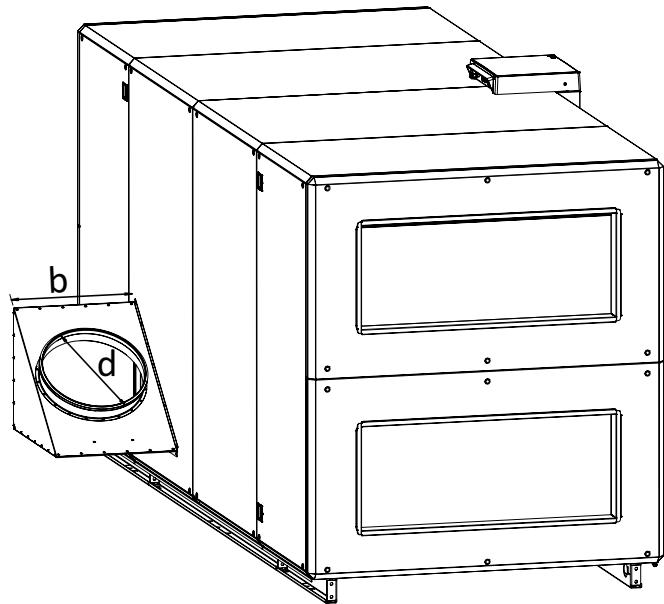

## 2. Installation

1. The adapter is mounted using self-tapping screws, in pre-drilled holes, above the intake at the rear of the air handling unit.
2. The duct is routed from the adapter to the extract air duct, see the example. The duct is fastened in the adapter using self-tapping screws.

NOTE! The adapter must not bear the weight of the duct.

### **3. Dimensions**

| <b>Size, adapter</b> | <b>Length b, mm</b> | <b>Diameter d, mm</b> |
|----------------------|---------------------|-----------------------|
| 005                  | 355                 | 250                   |
| 008                  | 420                 | 315                   |
| 012                  | 505                 | 400                   |
| 020                  | 505                 | 400                   |
| 030                  | 605                 | 500                   |
| 040                  | 730                 | 630                   |

### **3. Data**

Calculation of flow and velocity smoke outlet, at 200 Pa  
duct pressure

| <b>AHU</b> | <b>Ø (mm)</b> | <b>Motor</b> | <b>Max. flow (m³/s)</b> | <b>Velocity (m/s)</b> | <b>Pressure drop (Pa)</b> |
|------------|---------------|--------------|-------------------------|-----------------------|---------------------------|
| PX04       | 250           | E1           | 0.45                    | 9.2                   | 68                        |
| PX05       | 250           | E1           | 0.6                     | 12.2                  | 121                       |
